Building GharDilaDo.com — India's Smartest Way to Rent | AI
Generalist | Solo-Shipped PropTech from Scratch to Production |
Educator

Gandhinagar, Gujarat, India

Summary

I'm a builder, an AI-native founder, and at my core—an educator. I build systems that turn complex technology into simple, scalable real-world solutions.. My journey spans from teaching Science in JNV classrooms to building India's smartest rental platform, GharDilaDo.com. As a founder, I don't just ideate; I ship. I built GharDilaDo from scratch—designing, coding, and deploying the entire PropTech ecosystem using AI-native workflows. My classroom manager mindset helps me build systems that are intuitive, scalable, and human-centric. My technical stack: → AI-Native Development: Cursor + Agentic AI for 10x shipping speed. → Full-Stack Architecture: React + Vite + Supabase for production-ready apps. → Prompt Engineering: AI-driven features that solve real user problems. → Education-Driven Logic: Making renting transparent and hassle-free. I still believe in inspiring young minds—but now I do it through the products I build. Whether managing a classroom of 40 students or a codebase of 40,000 lines, the goal is the same: clarity, execution, and impact.
